Pneumatic**

# Our complete accessories offer

It is not always about tools! Other factors and products in your workplace environment contribute to your productivity. We offer specific solutions focused on PERFORMANCE, SAFETY & ERGNOMICS to improve your tools' efficiency and your workstation area.

## Performance

Optimize the performance of your power tool by using accessories specifically designed to leverage the full capacity of each tool, while extending its lifespan.

### Effi max hose

Robust but light, a heavy-duty hose to power your tool.

### Pneumatic oil

Specific air oil to lubricate air tools in order to ensure the best performance and a longer lifetime.

### FRL

Filter – Regulator - Lubricator stages allow the best air conditions to power the tool to its maximum capacity.

### Dust extraction system

Can be applied on material removal tools, such as grinders & sanders, to keep work areas clean and free from dust and particles.

### Tool protective covers

Protect your tools from hits and dents for an extended use.

### Stud cleaner

Clean the nuts before bolting to achieve and maintain the right tightening torque.

## Optimal air line solution

Chicago Pneumatic's air line solutions are customized for the user to give him the best and safest experience while optimizing his tools performance and reducing production costs.

# Safety

Reduce the risk of accidents with a selective list of accessories which can:

- protect the operator using a power tool.
- minimize risks of injury in the event of an accident.
- limit a dangerous effect.

## Socket retaining ring

Avoid socket projection from square drive impact wrenches.

## Air fuse

Fixed on the air line, it cuts the air off in case of air line breakage.

## Easy flow coupling

Ensures a safe disconnection of the hose under air pressure but keep the same air performance.

# Ergonomics

Transform your experience by selecting accessories bringing more comfort while enabling to reach higher productivity everywhere: at tool, operators and workstation levels.

## Balancers

To suspend the tool and take the weight away from operators' arms.

## Hose reel

For clean and hose-free workshop.

## Air flex

Make all rigid hoses flexible and multidirectional.

## Vibration damping side handle

Make the tool more comfortable by decreasing the feeling of vibrations transmitted to the operator.

# Ultimate set-up

Combine accessories benefits to create the solution you need

## Over 110 years of experience

Since 1901 the Chicago Pneumatic (CP) name has represented reliability and attention to customer needs, with construction, maintenance and production tools and compressors designed for specific industrial applications. Today, CP has a global reach, with local distributors around the world.

Our people start every single day with a passion to research, develop, manufacture and deliver new products that are meant to meet your needs not only today, but tomorrow as well.

To learn more about our extensive range of tools, construction equipment, industrial and portable compressors, accessories and workshop equipment, please visit [www.cp.com](http://www.cp.com).

## There is always a consumable matching your tool.

Some examples below:

### Sockets

### Chisels

### Pads

### Saw blades

### Needles
